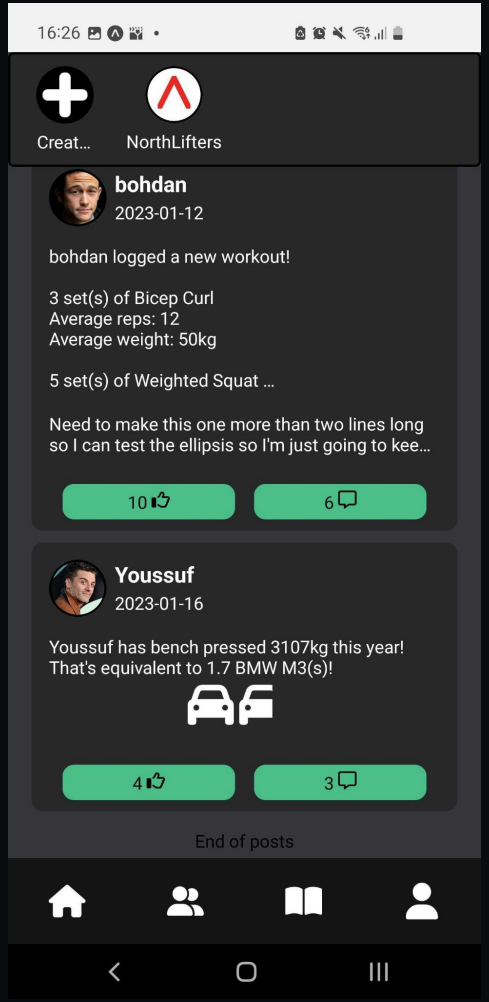
Users

- Users can create and edit a profile, add friends, and join groups of users

- Users can view other users' profiles, and their shared workouts

- Users can log their workouts, detailing sets, reps and weights

- Users can share workouts to a shared group feed, and display them on their profile



Groups

- Groups store collections of users who want to share workouts, or compare personal bests

- Groups have their own messaging room, where they can plan workouts together

- Group name, picture and members can be changed by any group member
